

Precision meets Motion

EWS GROUP WORLDWIDE

EWS
Tool Technologies

INNOVATION AND SPEED

Our key competence

EWS is your provider for solutions for driven and static tool holders for CNC lathes, special designs, accessories and a repair service.

What we are made of ...

Motion, speed, precision – this is the world of EWS. We call it “Precision meets Motion”, because we are aware of the importance of precision for the future of our customers and target markets.

Our focus is on highest quality standards and utmost commitment to ensure an optimal design of our products in form and function.

Accepting challenges

Only the best solution is what we aim at. We are stimulated by difficult tasks with which our customers confront our engineers and technicians. We accept our customers' feedback as impulses to optimize existing elements, to supplement missing elements and finally to create new elements.

Worldwide

Wherever you produce, wherever you need our products, we are at your disposal. Our networks in Germany, Korea and the USA provide you with the necessary background.

GERMANY

EWS Germany

In Germany the name of EWS has been a synonym for competence and innovation for more than 50 years. Our head office in Uhingen is situated in Southern Germany (State of Baden-Württemberg):

- Collets, sealed up for tools with inner cooling system
- Collets for threading, with and without compensation
- Pressure- and Draw-in Collets
- Accessories

The USA Subsidiary: Command Tooling Systems

Early 2008, Command Tooling Systems became the newest member of the EWS group. Command is a leading manufacturer of tools for CNC machining centers. This expansion of the EWS group will better serve the growing markets for milling and turning machines. In addition to Germany and South Korea, EWS now offers manufacturing and full service in North America to better serve its customers worldwide.
