Why Modular?

- + Preset cutting tools are laying ready at the machine
- + Quick change through only one clamping point
- + No risk of injury when changing tools
- + Clamping of the inserts without any radical force
- + No loose parts

+ Easy Installation

Our modular toolholders ensure that you are provided with an easy installation of your clamping tool to prevent downtime and get the maximum production from your machine.

+ Quick Change

Our modular toolholders provide you the solution of changing your tools in < 1 minute in comparison to standard toolholders that normally take 5-10 minutes.

+ Reliability

Our modular toolholders ensure that your clamping inserts are on centerline for accuracy and repeatability
